

## IDGS: Clinician Direct Check List

- 
- Current script with therapy prescribed and diagnosis codes identified
- Needed to submit a budget with monies in direct clinical
  - Script is within a year of the last script- does **not** have to align with budget year
- 
- Therapy can only be at the paid out at the 90% outlined in IDGS grid (back)
- This is based off professional's credentialing not services provided
  - This is based off of an hour of service- if session invoice is less we need to calculate the hourly rate
  - The invoice **cannot** exceed the amount outlined by Medicaid- if it does we cannot pay any portion of it
- 
- Obtain and run the providers credentials to assure they are licensed/registered through <http://www.op.nysed.gov/opsearches.htm>
- If their registration does not come up through this site they can't provide the services
- 
- Therapy plan written by the therapist and signed by primary doctor (this means they are agreeing that this will benefit the individual) This can be provided after we start reimbursement- we should halt reimbursement if this is not provided in a timely manner
- This should include and evaluation, long and short term goals and how they are going to reach them
- 
- A session note is required for every invoice processed- this would include what was accomplished during that session and is written by the therapist
- 
- Semi-Annual progress note with recommendation to continue therapy- it is easy to tie this with the LP as it does not need to be exactly 6 months- this should be written and signed by the therapist
- 
- Invoice for services stating individuals name, amount of sessions, length of sessions, cost per session, session notes and proof of payment- **This is what is uploaded in eVero for reimbursement**

All documentation needs to be updated annually when the script expires or the therapist changes
